## FOREWORD

The Fourth Schedule of the Constitution assigns thirty-Five (35) functions to the National Government and fourteen (14) to the County Governments. Among the key responsibilities of the County Government is development planning. Section 104 of the County Government Act, 2012, mandates each County Government to formulate plans, stipulating that no public funds shall be appropriated outside of an established planning framework. Section 107 further outlines the types and purposes of County plans, which serve as the foundation for all budgeting and spending within the County.

Additionally, Section 126 of the Public Finance Management Act (PFMA), 2012, requires County Governments to prepare a development plan in accordance with Article 220(2) of the Constitution. This plan must be submitted to the County Assembly for approval no later than 1st September each year. In light of this, the Department of Finance, Economic Planning, and ICT has coordinated the preparation of the third Annual Development Plan (ADP), aligning with the third-generation County Integrated Development Plan (CIDP) for 2023-2027. It is with great pleasure that I present this plan, which outlines priority programs and projects that have been meticulously crafted to build on lessons learned and milestones achieved from previous budget implementations. This plan is the cornerstone of our commitment to the people of Nyandarua, aligning with both the County's Change Agenda and the National Government's Bottom-up Economic Transformation Agenda.

Stakeholder involvement was crucial in the preparation of the CADP. Various sector stakeholders were invited to forums to share their proposals, while the public was encouraged to submit their inputs in writing. The Department's technical team also contributed significantly during the preparation process.

The CADP is structured in accordance with the Medium-Term Expenditure Framework (MTEF), with development priorities organized into four key sectors: Governance, Human Resources, Productive, and Infrastructure. Good governance is critical for the efficient delivery of services to County residents, ensuring optimal outcomes. Departments and entities within this sector have developed strategies and programs that enhance coordination and service delivery. The County has also implemented robust programs to support human resource development, including significant investments in healthcare, social protection, early childhood education, and youth training through vocational institutions, among others.

The financing of the ADP 2025/26, with a total resource outlay of Kes. 7,864.82 will be sourced from key County revenue streams, including the equitable share allocation, conditional grants, own-source revenue, and support from development partners. The County is committed to intensifying efforts to mobilize sufficient resources to fully implement this plan.

Under the dedicated leadership of His Excellency the Governor, the County administration is fully committed to executing this plan, with the aim of achieving the goals and objectives outlined in the third County Integrated Development Plan. Collaborative efforts from all stakeholders are essential to drive development, create wealth, and foster enhanced and sustainable livelihoods for all residents.

## ACKNOWLEDGEMENT

I wish to express my heartfelt gratitude to His Excellency the Governor, whose visionary leadership has been crucial in the development of this plan. I would also like to extend special appreciation to the CECM for Finance, Economic Planning, and ICT, whose steadfast dedication has been key to the successful completion of this plan.

I would like to recognize the commitment and hard work of the Nyandarua County staff, who, both directly and indirectly, contributed to this initiative. The Economic Planning team, in particular, played a vital role in the creation of this plan. Their insightful critiques, contributions, and valuable perspectives have greatly enhanced the final outcome.

I am deeply grateful to the people of Nyandarua County, whose consistent support and active involvement in offering suggestions have been essential in refining service delivery. Your goodwill and participation are crucial to advancing the county's governmental objectives and ensuring long-term sustainability.

The teamwork and collective effort shown in the preparation of the CADP 2025/26 underscore a shared dedication and passion for achieving better outcomes for the residents of Nyandarua. These attributes will be invaluable as we move forward with the implementation of this plan.

## CONCEPTS AND TERMINOLOGIES

**Baseline:** Baseline is an analysis describing the initial state of an indicator before the start of a project/programme, against which progress can be assessed or comparisons made.

**Bottom-up Economic Transformation Agenda:** It is an economic model that aims at economic turnaround and uplifting the lives and livelihoods of those at the bottom of the pyramid.

**Green Economy:** The green economy is defined as an economy that results in improved human well-being and social equity, while significantly reducing environmental risks and ecological scarcities. The policy framework for the green economy and green growth in Kenya is designed to support a globally competitive low carbon development path through promoting economic resilience and resource efficiency, sustainable management of natural resources, development of sustainable infrastructure and providing support for social inclusion. The Green Economy Strategy and Implementation Plan (GESIP) 2016 aims at guiding the National and County Governments as well as other actors to adopt development pathways with higher and more efficient growth, cleaner environment and higher productivity.

**Indicator:** An indicator is a sign of progress /change that result from your project. It measures a change in a situation or condition and confirms progress towards achievement of a specific result. It is used to measure a project impact, outcomes, outputs and inputs that are monitored during project implementation to assess progress.

**Outcome Indicator:** This is a specific, observable, and measurable characteristic or change that will represent achievement of the outcome. Outcome indicators include quantitative and qualitative measures. Examples: Enrolment rates, transition rates, mortality rates etc.

**Outcome:** Measures the intermediate results generated relative to the objective of the intervention. It describes the actual change in conditions/situation as a result of an intervention output(s) such as changed practices as a result of a programme or project.

**Output:** Immediate result from conducting an activity i.e. goods and services produced. Performance indicator: A measurement that evaluates the success of an organization or of a particular activity (such as projects, programmes, products and other initiatives) in which it engages.

**Programme:** It is a grouping of similar projects and/or services performed by a National/County Department to achieve a specific objective. The Programmes must be mapped to strategic objectives. Project: A project is a set of coordinated activities implemented to meet specific objectives within defined time, cost and performance parameters. Projects aimed at achieving a common goal form a programme.

**Sectors:** Is a composition of departments, agencies and organizations that are grouped together according to the services and products they provide. They produce or offer similar or related products and services, and share common operating characteristics.

**Target:** A target refers to planned level of an indicator achievement

## CHAPTER ONE

### INTRODUCTION

#### **1.1 Overview of the County**

##### **Introduction**

This chapter provides an overview of the county, the rationale for preparation of ADP, preparation process of this Plan and the overall linkage of this plan to the County Integrated Development Plan III and other development plans.

##### **Location and size**

The County is located in the Mt. Kenya and Aberdare belt of Central Kenya in the Republic of Kenya. It borders Kiambu to the South, Murang'a to the Southeast, Nyeri to the East, Laikipia to the North, and Nakuru to the West. It is a member of the Central Region Economic Bloc (CeREB) comprising of; Kiambu, Murang'a, Nyeri, Kirinyaga, Embu, Tharaka Nithi, Meru, Laikipia and Nakuru counties. Its headquarters are in Ol Kalou town within Ol kalou municipality, which is 150 Kilometres North West of Nairobi, the capital city of Kenya. Ol Kalou town where the County headquarters are is situated along the Gilgil-Nyahururu road. The town is also situated along the Njabini – Ndundori road. This interconnectivity provides Ol'Kalou with an enviable opportunity to engage in trade and investments as it can be considered a hub within its environs

Nyandarua is situated between latitude 0°8' North and 0°50' South and longitude 35°13' East and 36°42' West. The County has an area of approximately 3,286 square kilometers, some of which is covered by the Aberdare Ranges.

##### **Economic Mainstay**

The County is a food basket for the central region and the country. Predominantly majority of its inhabitants are farmers implying that its mainstay is agriculture. The favorable climatic conditions, fertile soils, large portions of arable land and the industrious nature of the residents has made the County be a leading producer of Irish potatoes, cabbages, carrots, cow peas, and other horticultural produce as well floriculture. The County is also a leading producer of dairy products with milk being produced in almost every household. The agriculture sector employs around 69% of the population and contributes to approximately 73% of household incomes.

Additionally, general commerce, construction, tourism-related activities, and the lumber sector also contribute sizably to the county's gross domestic product. They also create numerous employment opportunities for the local residents and immigrants. The Micro Small and

Medium Enterprises (MSMEs) are thriving across the County especially in the urban, town and market centres. They act as major contributors to the county's own source revenue envelope.

The County's strategic location within the Central Region Economic Block (CeREB) and the country connotes that access to market is guaranteed. The large-scale enterprises are not highly established but there is great potential.

Road Interconnectivity to the neighboring counties and urban centres/towns such as Nakuru, Gilgil, Nyahururu, Naivasha, Kiambu, Murang'a, Nyeri and Nairobi makes Nyandarua prime for trade and investment opportunities.

### **Demographics**

The 2019 Kenya National Population and Housing Census report (KPHC) stated that Nyandarua County had a population of 638,289 persons of whom 315,022 (49.3%) were male and 323,247 (50.6%) were female. The County had a total number of 179,686 households with an average household size of 3.5 persons. The population density at the time was 194 persons per KM<sup>2</sup>. The population projections are anticipated to be 721,112 in 2025 and 746,009 in 2027.

As per the KPHC report of 2019, Kinangop Sub-County had the highest number of households with a population of 205,280 persons whereas Ol-Joro-Orok had the least number, with 97,965 persons. This implies that 32.16% of the entire County population resides in Kinangop Sub- County while 15.34% reside in Ol-Joro-Orok Sub- County.

The County is progressively urbanizing and currently has three municipalities namely; Ol Kalou, Mairo Inya and Engineer. Proportionately, only 10.34% of the total County population resides in urban areas of Engineer, Njabini, Ol-kalou, Ndunyu Njeru, Kasuku, Ol-joro-orok and Mairo Inya. Increased investments in urban, town and market centres has led to growth in their population. The investments include; street lights and floodlights, drainages, parking lots, market infrastructures, tarmacking and pavements, social halls, sports infrastructure among others.

### **Political and Administrative Units**

#### **Political units**

The County has 5 constituencies namely Kinangop, Kipipiri, Ol-Kalou, Ol-Jor-Orok and Ndaragwa. Kinangop is the largest constituency by both population and landmass measures. Ol Jor Orok on the other hand is the smallest constituency.

## Political Units

Constituency	Wards
Kinangop	Murungaru, Njabini, Githabai, Magumu, Nyakio, Engineer Gathara, North Kinangop
Kipipiri	Githioro, Wanjohi, Geta, Kipipiri
Ol-kalou	Mirangine, Kanjuiri, Rurii, Kaimbaga, Karau
Ol-joro-orok	Gathanji, Weru, Charagita, Gatimu
Ndaragwa	Shamata, Kiriita, Ndaragwa Central, Leshau Pondo

## Administrative units

The County has five administrative sub-counties under the County Government's jurisdiction. They include; Kinangop, Kipipiri, Ol Kalou, Ol Joro Orok and Ndaragwa. Each sub-county is headed by a Sub-County Administrator who co-ordinates service delivery. A sub-county is further divided into wards with the County having a total of twenty-five (25) wards, administered by Ward Administrators. The number of wards per Sub-County is dependent on the sub-county area. Kinangop is the biggest Sub-County with eight Wards while Kipipiri, Ol'Kalou and Ol'Joro Orok have four Wards each and Ndaragwa has five Wards.

Kinangop being the largest Sub-County covers 939 Km<sup>2</sup> while Ol'Joro Orok Sub-County is the smallest, covering 439 Km<sup>2</sup>.

## Administrative Units

Sub County	No. of Wards	Area (Km <sup>2</sup> )
Kinangop	8	939
Kipipiri	4	544
Ol'Kalou	5	670
Ol'Joro Orok	4	439
Ndaragwa	4	654
<b>Total</b>	<b>25</b>	<b>3,246</b>

## Sectoral highlights

### Health Services Provision and Infrastructure

The Department of Health is committed to provision of the highest standards of health to its clients. Service provision in the department is structured in tiers in line with the Kenya Essential Package of Health (KEPH). The lowest level of service, level 1, is the community which is served by community health units. Dispensaries and health centers are in level 2 and

3 respectively. The county has two public hospitals: JM Kariuki County Referral and Engineer County Hospital.

Health infrastructure is fairly well developed, with the majority of the population having access to a health facility within the 5Km radius as recommended by the WHO. The two hospitals are undergoing major upgrades of both physical infrastructure and equipment. Completion of the Mashujaa Complex at JM Kariuki County Referral Hospital will be a game-changer in provision of health services as this will result in expansion of the range of services provided by the hospital including specialized clinics. The County is also in the process of upgrading five high volume health centers into hospitals to increase access to specialized services, while at the same time, increasing revenue streams for the department to support delivery of services.

### **Roads, Energy and other Infrastructure**

The County has a classified road network of 3,400 Kms of which 625 Kms of road is bitumen standard, 1,872.36 Kms is gravelled with 3,934.5 Kms classified as earth roads. The County Rural Machinery Programme has been instrumental in the opening of new feeder roads, maintenance and rehabilitation of earth roads to gravelled category and low and sustainable costs compared to the output emanating from private contracted roads.

Additionally, the ongoing construction of roads in the County will see the length of paved roads increase by 146 Kilometers contributing to road network connectivity in the Central Kenya region.

On access to electricity based on the 2022 CSA, Nyandarua County has only 50% of households connected to the national grid. The County has the highest proportion of households using solar energy as the main source of lighting in the larger Central Province estimated at 28%, and significantly higher than the national average of 19%. Only about 13% of the households in Nyandarua County rely on LPG Gas as the main source of cooking energy.

The Gilgil- Nyahururu railway line traverses through the County. However, the line was initially in a state of disrepair but rehabilitation of the line is ongoing through collaboration with the National Government.

### **Water, Natural Resources, Sanitation and Climate change**

The number of households in Nyandarua County according to the 2019 census was 179,686 with a population of 638,832 persons. The number of households connected to piped water is 46,400 as at 2023, which accounts for 25.82% of the total households.

A total of 22 rivers flow through Nyandarua County, of which eight are permanent, namely Malewa, Ewaso-Narok, Pesi, Turasha, Chania, Kiburu, Mkungi and Kitiri. The County also

hosts Lake Ol' Obolosat, the only lake in Central Kenya, and it's also the largest water mass in the County. Although it is a small lake with an average size of about 43 Km<sup>2</sup>, the lake's catchment area is estimated as 4,800 sq.km encompassing Nyandarua Ranges, Satima Escarpment and Ndundori Hills. The lake is home to over 300 different species of birds and a large number of hippos.

The County's first sewer system is currently under construction in Ol-Kalou Town under the National Government's Sustainable Water Supply and Sanitation Programme.

The County experiences two rainy seasons with a long rainy season from March to May, with a maximum rainfall of 1,600 mm and a short rain season from September to December, with a maximum rainfall of 700 mm. Rainfall intensity varies according to location. Areas near the Aberdare slopes receive sufficient rainfall, whereas rainfall in the lower parts of Ndaragwa plateau is scanty and erratic.

### **Agriculture, Livestock and Fisheries**

#### **Main crops produced**

The main crops grown are potatoes, maize, vegetables and wheat. Food crops constitute the largest proportion of the farming area. Some of the food crops grown include cabbages, peas, carrots and potatoes. The main cash crops grown in the county are cut flowers and horticultural produce, although the revitalization of Pyrethrum has been ongoing.

#### **Acreage Under Food and Cash Crops**

The acreage in the County under cultivation is 97,254 ha out of the total arable area of 184,900 ha. This indicates that more than half of the arable land is cultivated. Apart from some periods of dry spells, the region experiences adequate rains.

#### **Average Farm Sizes**

Large and small farms are evenly distributed across the county. The large farms are mainly used for dairy and horticulture farming. Bigger sizes of land are being sub-divided into smaller parcels, in both the low and high-potential zones. This, the overuse of the land among others has resulted to low productivity.

#### **Main Storage Facilities**

Nyandarua County has two National Cereals and Produce Board (NCPB) stores. The largest store is located in Ol'kalou, with a storage capacity of 100,000 bags. The other NCPB store is

in Lereshwa – Kipipiri sub-county, with a storage capacity of 50,000 bags. There are two potato cold storage facilities, the Ol'kalou cold storage which is publicly owned, and the Midland store, which is privately owned. The cold storages have capacities of 100,000MT, and 65,000 bags respectively. There are numerous traditional maize cribs and potato stores erected by individual farmers that could on average hold 20 bags and 10 bags respectively.

### **Agricultural Extension, Training, Research and Information Services**

There are four institutions involved in agricultural training and services. There are two Agricultural Training Centers (ATCs) in Njabini and Ol'Joro Orok. The ATCs are involved in the training of farmers on farming techniques both in crop and livestock farming. The Animal Husbandry Industry Training Institute (AHITI) located in Gatimu offers courses on animal husbandry, and the Kenya Agricultural and Livestock Research Organization (KALRO) located in Ol'Joro Orok conducts research and offers advisory services. There are also agricultural mechanization service stations in Nyahururu and Kinangop which provide mechanization services to farmers.

### **Main Livestock Breeds**

Livestock farming is one of the main activities in the county. Livestock breeds reared are both indigenous and exotic. In the livestock sub-sector, dairy farming is the dominant enterprise. Beekeeping is also practised within the county, with the main source of honey being the Aberdare Forest, in Ndaragwa sub-county. Value-addition activities on livestock products in the county are largely small-scale. The activities include milk processing, cooling of milk, processing and packaging of honey and leather tanning.

### **Ranching**

Ol'Magogo is the only ranch in the county. The ranch, located in Kipipiri Sub-County, has an area of 300 hectares and mostly rears sheep and cattle. It is run by the Kenya Agricultural Research Institute (KARI).

### **Main Fishing Activities**

Fish farming has gained popularity in the County, with more than 1,300 farmers taking up the economic activity. Most of the fish harvested is for local consumption. The main fish species reared are tilapia, catfish, trout and common carp. Fishing activities are mainly conducted in

fish ponds, rivers, dams and in Lake Ol’Bollosat.

### **County Revenue Streams**

The County programmes sources of revenue include; equitable share, conditional grants, and the own source revenue. The equitable share is the biggest contributor of county revenue while conditional grants are the second largest. Own source revenue contributes the least amount.

To improve our OSR collections, the county will adopt automatic and cashless payment systems as well as streamline our taxation and fees structure.

In addition, the county government will strengthen collaboration and data sharing between different organizations and departments within and outside the County Government to enable it to monitor its revenue base, evaluate its revenue-raising activities and adopt an evidence-based approach to OSR policy decision-making.

As part of the implementation of the National Policy to Support County Governments enhance their Own Source Revenue, the Commission on Revenue Allocation (CRA) in collaboration with the National Treasury and other stakeholders is in the process of developing model tariffs and pricing policies. County Governments are expected to customize this model policy to develop their respective tariffs and pricing policies in line with Section 120 of the County Government Act, 2012. The tariffs and pricing policies will form the basis for levying fees and charges by the County Governments.

### **1.2 Rationale for preparation of the County Annual Development Plan**

Section 126 of the PFM Act provides that every County government shall prepare a development plan in accordance with Article 220 (2) of the Constitution that includes:

- a. Strategic priorities for the medium term that reflect the County Government’s priorities and plans;
- b. A description of how the County Government is responding to changes in the financial and economic environment;
- c. Programmes to be delivered with details for each programme of-
  - i. The strategic priorities to which the programme will contribute;
  - ii. The services or goods to be provided;
  - iii. Measurable indicators of performance where feasible; and
  - iv. The budget allocated to the programme;

- d. Payments to be made on behalf of the County Government, including details of any grants, benefits and subsidies;
- e. A description of significant capital developments;
- f. A detailed description of proposals for the development of physical, intellectual, human and other resources of the County, including measurable indicators where those are feasible;
- g. A summary budget in the format required by regulations; and
- h. Such other matters as may be required by the constitution or the PFM Act

ADP preparation is requisite with the recognition that CIDP is a five-year medium-term plan implemented annually. The sectoral five-year programmes are split into short-term annual programmes for ease of implementation and in recognition of the fact that public sector experiences resource scarcity.

The County Executive Committee Member responsible for planning is required to coordinate the development planning function following the format prescribed by regulations and shall, not later than 1<sup>st</sup> September in each year, submit the development plan to the County Assembly for approval, with a further copy sent to the Commission on Revenue Allocation and National Treasury.

The PFM Act, 2012 also requires the County Executive Committee member to publish and publicize the Annual Development Plan within seven days after its submission to the County Assembly.

### **1.3 Preparation process of the Annual Development Plan**

In line with the Constitution of Kenya and the attendant legislations such as the County Governments Act, 2012 and the Public Finance Management Act, 2012, citizen and other stakeholders' engagement is compulsory in the public sector planning and budgeting process. This is because the decisions made by public entities are done on behalf of and for the benefit of the citizenry.

In conformity with the legal requirements, the 2025/26 FY County Annual Development Plan was prepared through an open and consultative process. The preparation entailed;

- a) Preparation and dissemination of the 2025/26 FY Budget Circular. The Budget circular highlighted the priority areas, the deadline for preparation of key budget documents in sync with the county budget cycle, the various formats for use in preparation of the

different budget cycle documents and the manner in which the citizen and stakeholder consultations will be carried out.

- b) Implementation review of the CADP for 2023/24 FY. Through this review, programmes and projects which were not implemented, ongoing and multiyear in nature have been incorporated. This will ensure systematic implementation of all earmarked programmes and eliminate incidences of white elephant projects. In turn this will bring about value for money to the county citizenry.
- c) The CIDP shows all the programmes and projects which should be implemented over the plan period of five years clearly indicating what should be undertaken in each year. This Annual Development Plan contains programmes and projects captured for implementation in the second year of the CIDP 3.
- d) Consultative meetings were held among the County Executive departments with the process spearheaded by the Economic Planning Directorate. These consultations helped in identifying the priority areas for the county, how to fit the priorities into the envisaged resource envelope and how to design programmes to leverage on the synergies in existence.
- e) Public participation where all interested stakeholders submitted their proposals and views for incorporation into the CADP.
- f) Sector specific stakeholders consultations to align the document to technocrats and potential donors and the National Government to align to National objectives.
- g) Consideration and approval by the County Executive Committee. Being the apex decision making and policy direction organ, their consent was inevitable to ensure the plan conformed to the County's vision.

Further, the preparation process entailed ensuring that this plan is aligned to existing global, regional, and National Development policy instruments such as the; Sustainable Development Goals (SDGs), Africa Agenda 2063, the Kenya Vision 2030, the Medium-Term Plan IV and the Bottom-Up Economic Transformation Agenda (BETA) as well as other relevant sector and strategic guidelines.

#### **1.4 Annual Development Plan Linkage to existing development plans**

##### **ADP linkage with CIDP 3 and the Budget**

The ADP is a key document that comprises a one-year extract of the five-year County Integrated Development Plan (CIDP). The ADP serves as a basis for the development of the

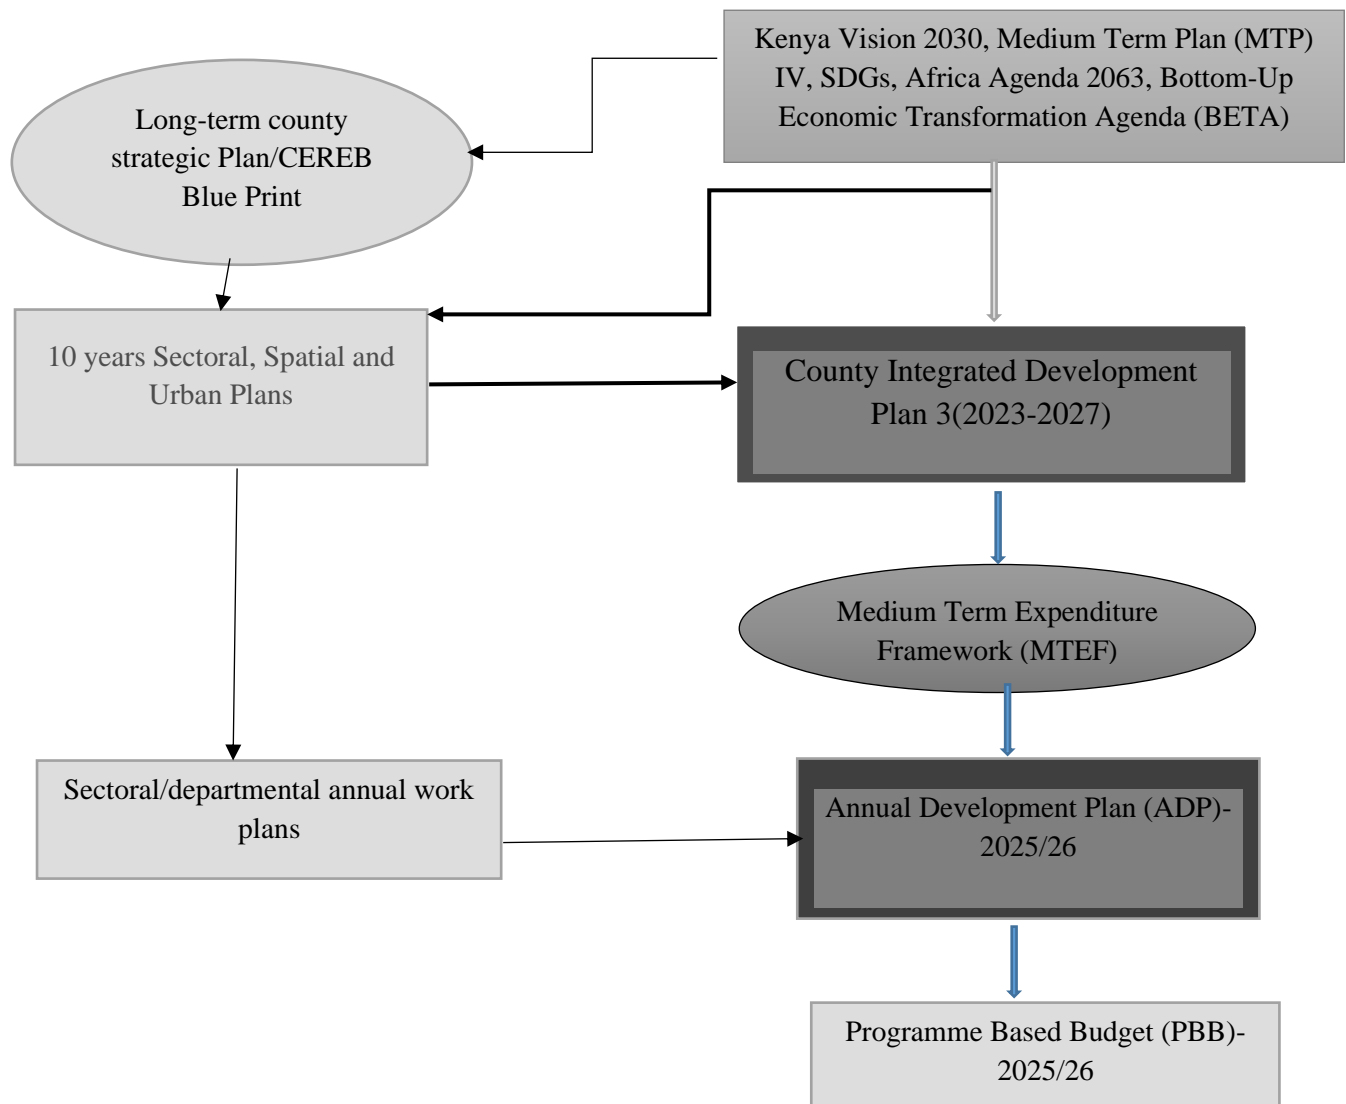

County's annual budget. It guides the budget-making process for the next financial year. The ADP forms the initial stages of the budget-making process hence it informs the County executive's decision in coming up with budget estimates.

The County Integrated Development Plan III (CIDP3) provides a framework for planning, budgeting, funding, monitoring and evaluation of programmes and projects in five-year terms. The CIDPs ensure the county's programme and projects are aligned with the national aspirations as contained in the Kenya Vision 2030 and its Medium-Term Plans. It is implemented through rolling one-year plans (Annual Development Plans) where programme-based budgets are drawn.

The priorities in CIDP 3 are aligned with Kenya's Vision 2030 and are in line with the new National Government administration agenda of Bottom-up Economic Transformation Agenda (BETA).

#### **Annual Development Plan (ADP) Linkage with other Development plans**

The ADP being a County guide for development in a given financial year is linked to other existing policy instruments. Majorly the instruments for consideration when preparing the ADP include the; Sustainable Development Goals (SDGs), Africa Agenda 2063, Kenya Vision 2030, Medium Term Plan IV, Bottom Up-Economic Transformation Agenda (BETA), sectoral/strategic plans, and County Integrated Development Plan III (CIDP3). Figure 1 shows the linkage of the ADP with other plans.

## CHAPTER TWO

### REVIEW OF THE IMPLEMENTATION OF THE PREVIOUS CADPS

This chapter offers an overview of the performance for the Financial Year 2023/24, examining the progress and status of projects while comparing the planned budget with actual expenditure. Additionally, it contrasts the allocations in the County Annual Development Plan (CADP) for FY 2024/25 with the budget for FY 2024/25, providing insights into how resources have been prioritized and aligned with strategic objectives for the coming year.

## 2.7: Sector challenges

The Human resource sector experienced the following challenges during implementation of the previous plan;

- i. Inadequate Sector funding
- ii. Sectoral Staffing shortage
- iii. Inadequate staff on job training
- iv. Lack of proper programme's policies
- v. Long bureaucracies while requesting for funds

## 2.8: Emerging Issues

- i. Climate change, no country today is immune from the impacts of climate change. According to World Bank, climate change could drive 216 million people to migrate within their own countries by 2050, with hotspots of internal migration emerging as soon as 2030, spreading and intensifying thereafter. Climate change could cut crop yields, especially in the world's most food-insecure regions. At the same time, agriculture, forestry, and land use change are responsible for about 25% of greenhouse gas emissions. The agriculture sector is core to addressing the climate challenge.
- ii. Recognition of Prior Learning, this is the contemporary focus on acknowledging and integrating the wealth of knowledge and skills individuals bring from their life experiences into formal education, shaping a more inclusive and practical approach to learning. Incorporation of Recognition of Prior Learning (RPL) into our Plans is a progressive step toward fostering an inclusive and effective education system. Recognizing and valuing the knowledge and skills that individuals have acquired through life experiences, whether formal or informal, empowers learners to harness their full potential. RPL not only promotes lifelong learning but also bridges educational gaps, offering a pathway for those who may have faced barriers to traditional education. As we integrate RPL into our education doctrine, we aspire to create a more dynamic and responsive educational landscape that honors diverse

learning journeys, ultimately contributing to the growth and development of the County.

- iii. Regional economic blocs, The Interim Independent Boundaries and Elections Commission (IIBEC) based County boundaries on population and geographical size. The establishment of the Counties resulted in planning units without economies of scale in production, manufacturing, and consumption. The creation of regional economic blocs gives Counties leverage to negotiate and create synergy. Nyandarua County is a member of the Central Region Economic Block (CeREB) bringing together ten counties drawn from the larger Mount Kenya region; Embu, Kiambu, Kirinyaga, Laikipia, Nakuru, Nyandarua, Nyeri, Meru, Murang'a and Tharaka Nithi. It is of paramount importance for the member Counties to strengthen the regional bloc to enhance economies of scale.
- iv. Mental and other health issues, the mental and other health issues of Staff, students and educators has become increasingly prominent. The Department of Health is working to address anxiety, depression, and other health challenges through better support systems and more comprehensive wellness programs.
- v. Technology Integration, as digital tools and platforms become more integral to medicine and education, there's a growing need to address issues related to digital technology, knowledge and literacy and therefore need to embrace technology.

## **2.9: Lessons learnt**

The following are the lessons learnt during the 2023-24 ADP Implementation period;

- i. Early implementation of programmes and projects to avoid accumulation of pending bills at the closure of the year.
- ii. Empowerment programs and policies that focus on empowering individuals and providing them with resources and support can have a significant impact on achieving social and gender equity.
- iii. Adequate Funding of Human Resource sector is necessary, this is for the purposes of seamless implementation of the Sector programmes and projects.
- iv. Work force is necessary for satisfactory implementation of Sector programmes and projects.
- v. Staff Welfare is essential in motivation of staff and onward boosting of Sector productivity.

- vi. Promotion and celebration of cultural diversity through the cultural programme enriches the community and fosters mutual understanding and respect.
- vii. Need for mobilization of financial resources to increase the resource envelope
- viii. There is a need for proper emergency preparedness, a lesson learned from the COVID-19 pandemic
- ix. There is a need to recruit and fill critical skill gaps thus ensuring that the County facilities can provide all the basic and specialized services to the citizenry

## 2.10: Recommendations

The following are the key recommendations after the challenges experienced;

- i. The Sector has challenges in implementation of its vision plan due to inadequate funding, adequate funding should be availed to facilitate seamless plan implementation.
- ii. Staff shortage has been an issue with some of the Sector Directorates having few staff, sufficient sector staff should be hired.
- iii. Staff welfare should be re-looked into to ensure the staff is motivated
- iv. Need to invest in Community health

## 2.11: Development Issues

*Table 2.9: Development Issues*

Sector	Development Issues	Causes	Constraints*	Opportunities**
<b>EDUCATION</b>				
Education	Need for Quality ECDE education	Inadequate ECDE infrastructural support led by increased enrollment	Constrained budget ceiling	Integration with existing Primary schools

## 2.6 Contribution of Achievements to the National, Regional and International Aspirations/Concerns for FY 2023/2024

Table 2.8: Linkages with National Development Agenda, Regional and International Development Frameworks

National/regional/ international obligations	Aspirations/goals	County government contributions/ interventions in the last cadp
<b>Water, Environment, climate change and natural resources</b>		
<b>Water development</b>		
Bottom-up economic transformation approach (beta)	Infrastructure – water & irrigation	-development of water sources.
		Establishment of water storage infrastructure
		Increase acreage under irrigation
	Environment and climate change	Ensure sustainable, equitable and efficient management of water resources guaranteeing access to clean and safe water to all fostering resilience to climate change, promoting environmental stewardship, and support economic growth within the county.
Sdgs	Goal 6: clean water and sanitation	Feasibility studies, project designs, construction of intakes at rivers and dams, drilling of boreholes, equipping of the projects
		Development and construction of water storage tank and other water infrastructure
		Design of water infrastructure, construction and operationalization
		Increase and improvement of water quality through environmental conservation
		Construction of conventional waste and water treatment plants
		Mapping and demarcation of the dams, de-silting, embankments repairs, spillway repairs, construction of cattle troughs and fencing
Medium term plans (mtp) iv and kenya vision 2030	Environment, water, sanitation and regional development	To ensure that improved water and sanitation are available and accessible to all
		To increase both access to safe water and sanitation in both rural and urban areas beyond the present levels
		To promote agricultural productivity the area under irrigation and drainage increase
African union agenda 2063	Aspiration 1- a prosperous africa based on inclusive growth and sustainable development	Every citizen has affordable and sustainable access to quality basic services in access to adequate and clean water and sanitation through urban and rural areas
East africa community vision 2050	Infrastructure	Assimilate access to safe water in term of quantity and quality, and sanitation through enhancement of water infrastructures and management, in water- bodies and trans-boundary water resources
<b>Environment management</b>		
Bottom-up economic transformation approach (beta)	Environment protection, water and natural resources sector	Mainstreaming environmental issues in cidp, functioning county environment committee, advisory and implementation of environmental and social safeguards in projects and programs
Kenya vision 2030 and mtp iv	Prioritizes conservation and restoration initiatives aimed at safeguarding ecosystems	Mainstreaming environmental issues in cidp, functioning county environment committee, good governance, awareness and capacity development

National/regional/ international obligations	Aspirations/goals	County government contributions/ interventions in the last cadp
Africa agenda 2063	Environmentally sustainable and climate resilient economies and communities	Mainstreaming environmental issues in cidp, functioning county environment committee, awareness and capacity development
Constitution of kenya 2010	A clean and healthy environment	Actualizing devolved environment functions, mainstreaming issues in county development
<b>Natural resources</b>		
MTP IV	National tree growing and restoration campaign( 15 billion trees)	1000 trees planted in turasha river riparian.
	Agroforestry and commercial forestry	Worked with stakeholders in planting over 1.5 million trees in forest and agricultural landscapes in the county.
	Post mining land reclamation and mine rehabilitation	Support quarry miners
SDGS	Sdg 15 life on land	Coordinating stakeholders and community in the protection, restoration and promote sustainable
Afr100	Rehabilitate 100 million hectares in africa	Worked with stakeholders in planting over 1500 trees in forest and agricultural landscapes in the county.
Bonn challenge	Rehabilitate 350 million hectares by 2030.	Worked with stakeholders in planting over 1500 trees in forest and agricultural landscapes in the county.
Convention on biological diversity	Address the underlying causes of biodiversity loss by mainstreaming biodiversity across government and society	Designation of lake ol bolossat as a unesco biosphere reserve
<b>Climate change</b>		
Fourth medium term plan (mtp iv)	Climate change finance	Fund mobilization for mitigation and adaptation
		Development of carbon market framework and regulation
		Development of ghg emission inventory
		Implementation of locally-led climate actions on mitigation and adaptation
		Conducting environmental impacts assessments for all climate related projects
Bottom-up economic transformation aproach (beta)	Mainstream issues of environment conservation, climate change to reverse deforestation, biodiversity loss, and land degradation	Promote tree planting to achieve the 15b trees by 2030
		Establishment of tree nurseries
		Allocate 3% of county development budget as county climate change fund
		Rehabilitation of riparian, water catchment areas and degraded forest areas
Sdgs	Sdg 13 climate action	Capacity building, research and knowledge management to improve community resilience and adaptive capacity to climate change.
		Implementation of locally-led climate actions on mitigation and adaptation
		Development of county climate change legal policies ghgs emission inventory
		Development of the county climate change information management information centres with up-to-date database

National/regional/ international obligations	Aspirations/goals	County government contributions/ interventions in the last cadp
Africa agenda 2063	Goal 7: environmentally sustainable and climate resilient economies and communities	Enhanced adoption of green and renewable energy including biogas, solar energy and transition to clean alternative energy sources
		Implement climate change mitigation and adaptation actions to improve community resilience to climate change
		Enhance early warning systems to manage and respond to climate risks and disasters
		Restoration and protection of fragile ecosystems through afforestation, reforestation, protection of riparian lands to improve forest and tree cover
<i>Paris agreement on climate change, 2015</i>	Contribute to the nationally determined contributions (ndcs) of reducing ghgs emission by 32%	Development of county climate change legal policies ghgs emission inventory
		Development of carbon market framework and regulation
		Implement climate change mitigation actions

Tourism, cooperatives development trade & industrialization and development

Bottom-up economic transformation approach (beta) and mtp iv	Msmes and manufacturing	V development of county aggregation and industrial park V operationalization of the cold storage V aggregation of producer cooperative societies V access to affordable capital through provision of trade fund V promotion of cottage industries
Sdgs	Sdg 1: end poverty in all its forms everywhere through various interventions in subsectors responsible for agriculture, trade, industrialization, cooperatives, health, and education.	V development and upgrade of various markets across the county
	Sdg 8: promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all through the productive sector programmes	
	Sdg 9: build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation through the productive sector and infrastructure sectors.	

Youth empowerment, sports and arts

Bottom-up economic transformation approach (beta) and mtp iv	Goal 16 - peace, justice and strong institutions	Department of youth empowerment, sports and the arts offering trainings, youth empowerment centres and the arts hub serve as a place to combat idleness among the youth
Sdgs	Sdg 8: decent work and economic growth..	Providing training and supporting creative industries.mentorship and bench marking .

National/regional/ international obligations	Aspirations/goals	County government contributions/ interventions in the last cadp
United nations 2030 agenda for sustainable development	Goal 8 - decent work and economic growth	By ensuring agpo rule is upheld, inter-county exchange programmes amongst others to promote youth employment, entrepreneurship and integration into the workforce.
African union agenda 2063	Aspiration 1: invest in africa's youth through provision of skills	provision of education, skills development, job creation and engagement in decision-making.
Kenya vision 2030, bottom-up economic transformation agenda and fourth medium term plan	Enhance youth participation in economic, social and political processes for national cohesion and development.	participation in economic, social and political processes for national cohesion and development.
The bottom-up economic transformation agenda	Creating a masterplan for upgrading infrastructure for sports and the arts	Equipped youth empowerment centres, studio and upgraded stadia
Kenya's 4th medium term plan (mtp iv) 2018- 2022	Harness creative sector for economic growth and job creation.	Funding of youth and gender programmes
United nations 2030 agenda for sustainable development	Goal 16 - peace, justice and strong institutions	Through offering trainings, youth empowerment centres and the arts hub will serve as a place to combat idleness among the youth

#### Agriculture, livestock and fisheries

Bottom-up economic transformation approach (beta) and mtp iv	Agricultural transformation	The county's five key value chains with the highest potential were mainstreamed through the navcdp program.
		Provision of 156,000 super nappier cuttings to farmers
		Provision of 1,434 inseminations in the ai programme
		Provision of breeding stock to farmers - 32 pigs, 2,826 chickens, 40 dairy goats, 78 sheep, and 40 heifers.
		Provision of extension services countywide
Sustainable development goals (sdgs)	Sdg 2: zero hunger	The county facilitated access to the subsidized fertilizer at the two cereal board stores located in ol'kalou and kipipiri.
		Provision of 4.2 million pyrethrum seedlings to farmers.
		Provision of 6 incubators.

## 2.7 Challenges

- Inadequate Budget Allocation:** Insufficient funding hinders project implementation, service delivery, and opportunities for external funding.
- Logistical and Staffing Issues:** Lack of vehicles and staff shortages impede fieldwork, monitoring, evaluation, and timely responses to incidents.
- Political Interference:** Political influences disrupt programs and project execution.
- Weak Law Enforcement:** Ineffective enforcement of regulations affects project outcomes.
- Infrastructure Deficiencies:** Aging infrastructure, lack of utilities, and insufficient resources compromise service delivery.

6. **Environmental and Land Issues:** Encroachment on public and riparian lands, coupled with human-wildlife conflict, hinders project implementation.
7. **High Costs and Market Volatility:** Fluctuating prices of materials and produce create economic instability for farmers and project delays.
8. **High Public Expectations:** Unrealistic public demands and limited resources lead to challenges in meeting expectations.

## 2.8 Emerging Issues

1. **Climate Change Impact:** Changing weather patterns affect water availability, agricultural productivity, and increase the frequency of extreme weather events, leading to infrastructure damage and reduced water supply.
2. **Technological Advancements:** While offering solutions, rapid technological changes require significant investment and expertise, challenging adoption.
3. **Aging Infrastructure:** Outdated systems need significant investment for repair and renovation.
4. **Water and Food Security:** Growing populations and industrial demands put stress on resources, necessitating innovative management strategies.
5. **Regulatory Changes:** Adapting to evolving policies requires resources and complex adjustments.
6. **Public Engagement:** Increasing need for community involvement in decision-making and conservation practices.
7. **Market Access and Value Addition:** Farmers face challenges in market access and need for value addition to boost income.
8. **Youth Involvement:** Low youth participation in agriculture requires initiatives to attract and engage them.

## 2.9 Lessons Learnt

1. **Proactive Maintenance and Investment:** Regular infrastructure upgrades and maintenance prevent costly emergencies and extend system lifespans.
2. **Embrace Technological Innovations:** Adoption of advanced technologies enhances efficiency, monitoring, and problem-solving capabilities.
3. **Integrated Management:** Holistic approaches in water, agricultural, and resource management lead to sustainable outcomes.
4. **Adequate Resource Allocation:** Sufficient funding, staffing, and equipment are crucial for effective performance and service delivery.
5. **Continuous Capacity Development:** Ongoing training and motivation of staff and stakeholders are vital for adapting to new practices and challenges.
6. **Climate Adaptation Planning:** Integrating climate resilience into planning mitigates risks from extreme weather events.
7. **Community Engagement:** Involving communities in decision-making improves support for initiatives and leads to better outcomes.
8. **Collaboration and Partnerships:** Partnerships with other sectors enhance problem-solving and resource-sharing.
9. **Focus on Project Completion:** Prioritizing and completing a few projects at a time ensures better management and successful execution.

## 2.10 Recommendations

1. **Develop Comprehensive Investment Plans:** Implement infrastructure maintenance schedules and prioritize critical projects to prevent system failures.
2. **Adopt Integrated Resource Management:** Use a holistic approach to water, agriculture, and environmental management.
3. **Incorporate Climate Resilience:** Assess risks and develop adaptive measures to address climate change impacts.
4. **Foster Community Involvement:** Raise awareness and encourage participation in conservation and water management initiatives.
5. **Expand Partnerships:** Collaborate with agencies and the private sector to share resources and enhance service delivery.
6. **Enhance Revenue Mobilization:** Innovate local revenue strategies to support development needs.
7. **Strengthen Legal Frameworks:** Finalize and implement draft bills and policies to improve governance and service delivery.
8. **Focus on Staff Welfare:** Invest in continuous training and motivation programs to improve service quality and staff retention.
9. **Leverage Technology:** Adopt advanced technologies for efficiency in service delivery and project management.
10. **Prioritize Project Feasibility:** Thoroughly assess project timelines, specifications, and budgets to ensure successful completion and sustainability.

<b>Programme 3: Energy Development</b>			
Installation of transformers		8.2	
Establishment of energy demonstration centres	1	0	Funds not allocated

Planned Project/ Programmes as outlined in CADP 2024/25	Amount Allocated in CADP 2024/202 5 (KShs.	Amount Allocated in the Approved budget 2024/2025	Remarks**
Installation of floodlights-20m & 30m flood masts	18	39.2	Priority project -additional allocation
Energized street/flood lights	20	20	More funds required for payment of KPLC bills
Maintenance of floodlights and streetlights (including migration from high sodium halogen bulbs to LED flood lights-20 and 30meters flood masts)	7	0	Funds not allocated
<b>Programme 4: Emergency Response and Disaster Preparedness</b>			
Equipping and operationalization of County Response Units	10	10.38	Fabrication of 3 fire engines & acquisition of safety kits
Inspection and compliance	1	0.5	Inadequate funding
Emergency Response volunteers training-Countywide	1	0	Funds not allocated
<b>Programme 5: Housing Development</b>			
Affordable housing offsite infrastructure	5	0	
County houses rehabilitation-Wanjohi & Huruma	6	0	All allocated Funds to renovation work for county offices in Nyahururu supplemented in the 1 <sup>st</sup> supplementary budget
Housing Database and inventory	1	2	All allocated Funds supplemented in the 1 <sup>st</sup> supplementary budget
Establishment of a GIS based Housing Database,	2	1	All allocated Funds supplemented in the 1 <sup>st</sup> supplementary budget
Trainings and seminars on ABT and current technology	0	0	

Most of the projects were allocated funds in the 2024/25 budget as planned in the CADP 2024/25. However, several projects received no allocation both in the CADP and the budget due to changed priorities and resource constraints-These projects include the material testing lab naad County bus parks that were outlined for construction in the County CIDP 3Most projects were allocated funds in the 2024/25 budget as outlined in the CADP 2024/25. However, certain projects, specifically in the Engineer and Mairo-Inya municipalities, received additional resources in the final budget. These municipalities had not yet established their boards or deployed necessary staff at the time of the CADP's preparation, which resulted in the need for increased funding.

## 2.7 Sector Challenges

- **Human Resource Constraints:** Insufficient staffing levels have reduced the capacity to effectively carry out key tasks and responsibilities.
- **Delays in Fund Disbursement:** Significant delays in fund releases have hindered the timely execution of planned activities and projects.
- **Inadequate Resource Allocation:** The limited allocation of resources has been insufficient to meet the operational needs of the departments.
- **Adverse Weather Conditions:** Heavy rainfall has disrupted the implementation of sector projects, leading to delays and increased costs.
- **Inadequate Office Space and Tools:** A lack of adequate office space and essential tools is impairing the effective operation of departments.
- **Insufficient Field Operation Vehicles:** The shortage of dedicated vehicles for field operations has hampered the efficient implementation of projects and programs.
- **Absence of Policy Guidelines:** The lack of clear policy guidelines is impacting proper functioning and decision-making within departments.

- **Encroachment on Road Reserves and Public Spaces:** Encroachment has compromised service delivery and the quality of work performed.
- **Political Interference:** Political interference has disrupted effective service delivery.
- **Lack of Clear Guidelines for National Government Projects:** The absence of clear guidelines for developing national government projects and programs has created challenges.
- **Lack of Synergy and Stakeholder Consultation:** Insufficient collaboration with other departments and stakeholders in project design, budgeting, project management, and contract administration has impeded progress.
- **Increased Vandalism of County Projects:** Rising incidents of vandalism have negatively impacted county projects.
- **Lack of Adequate Land for County Infrastructure and Projects:** The unavailability of sufficient land is hindering the development of county infrastructure and projects.

## 2.9 Lessons Learnt

- Timely fund disbursement is crucial for the successful and on-schedule completion of projects. Delays in funding directly impact project timelines, resource availability, and overall outcomes.
- Future projects should incorporate detailed risk assessments and contingency plans to manage unexpected challenges effectively.
- Allocation of sufficient funds is essential for full project implementation. Insufficient financial resources lead to incomplete work and reduced effectiveness of projects.
- Effective staffing and skilled personnel are critical to project success. Insufficient staffing levels hampered productivity, making it clear that proper workforce planning and capacity-building are essential for better project outcomes.
- The lack of essential tools and adequate office space hinders operational efficiency. Future planning should ensure the provision of necessary infrastructure and equipment to support smooth project execution and departmental functioning.
- The absence of adequate dedicated vehicles for fieldwork revealed the importance of logistical support. It was learned that having the right resources, including transportation, significantly improves the efficiency of field operations.
- The absence of formal policy guidelines led to operational confusion and inefficiency. Well-defined and communicated policies are vital for consistency, better decision-making, and efficient departmental performance.

- It was evident that adverse weather conditions had a substantial impact on project timelines. Projects should integrate environmental considerations into their planning phases, including flexible timelines and weather-resilient strategies.
- Encourage cooperation with other counties for disaster and emergency management.
- Prioritize community involvement in all project stages for ownership and sustainability.
- Recommend thorough assessments of project capacity to ensure timely and budget-compliant completion.
- Balance political interests with the County's strategic development plans.

## **2.10 Recommendations**

### **1. Develop and Implement Revenue Enhancement Strategies:**

- Formulate and execute innovative strategies within County departments to boost Own Source Revenue (OSR).
- Identify and diversify revenue streams, leveraging technology for efficient collection and monitoring.

### **2. Strengthen Emergency Preparedness and Response:**

- Establish comprehensive emergency preparedness plans, particularly for flood-prone areas.
- Conduct regular risk assessments and drills to ensure readiness and effective response.

### **3. Foster Interdepartmental Collaboration**

- Create formal frameworks for collaboration among departments to improve project planning, budgeting, and execution.
- Implement cross-departmental meetings and reporting mechanisms to track progress and address challenges.

### **4. Enhance Accountability and Transparency**

- Introduce stringent financial management practices and regular audits for public funds and donor grants.
- Ensure clear communication of financial processes and results to stakeholders.

### **5. Develop and Enforce Legal Frameworks**

- Advocate for the creation and implementation of legal and regulatory frameworks

that address governance and service delivery gaps.

- Review and update existing policies to align with best practices.

**6. Invest in Continuous Staff Training and Welfare:**

- Implement ongoing professional development programs for staff at all levels.
- Improve staff welfare through competitive benefits, a conducive work environment, and clear career progression paths.

**7. Leverage Feedback Systems for Improvement :**

- Expand the use of the complaints and compliments system for data collection to inform decision-making.
- Increase public awareness of this system to enhance engagement and trust.

**8. Strengthen Public-Private Partnerships (PPPs):**

- Identify and pursue strategic partnerships with private entities to expedite the implementation of County programs.
- Develop clear guidelines and frameworks to govern these partnerships for mutual benefit.

**11. Encourage Regional Cooperation**

- Establish cooperative agreements with neighboring counties for joint disaster and emergency management initiatives.
- Share resources and expertise to strengthen regional resilience.

**12. Implement Comprehensive Civic Education Programs:**

- Develop and roll out civic education initiatives for the public and County employees to enhance understanding of devolved roles and responsibilities.
- Use various platforms (e.g., workshops, media, community meetings) to reach diverse audiences.

**13. Ensure Community Involvement in Projects :**

- Involve the community at every stage of the project cycle, from planning to execution, to ensure ownership and sustainability.
- Establish feedback loops to incorporate community input and address concerns.

**14. Conduct Thorough Project Capacity Assessments:**

- Perform detailed assessments of the capacity required to complete and sustain projects before approval.
- Monitor and adjust project timelines, specifications, and budgets to meet set targets.

### 15. Align Political Interests with Strategic Plans :

- Balance political agendas with the County's long-term development goals through strategic dialogue and planning.
- Ensure that political decisions support, rather than hinder, the County's development agenda.

### 16. Secure Adequate Funding for Departments:

- Advocate for increased and timely budget allocations to departments to ensure they have the resources needed for effective service delivery.
- Explore alternative funding sources, including grants and partnerships, to supplement County budgets.

## 4.2 Resource mobilization and management framework by sector and programme

Resources will be allocated based on;

- (i) Development priorities identified in CIDP 3, the Governor's manifesto, the Kenya Kwanza manifesto, MTP IV, sectoral plans and stakeholder's consultative forums.
- (ii) Flagship Projects, the Bottom-up Presidential Agenda and The Governor's Change Agenda
- (iii) Ongoing projects: the emphasis is given to completion of on-going and unfinished projects and in particular infrastructure projects and other projects with a high impact on poverty reduction, equity, and job and wealth creation.
- (iv) Job creation: Specific consideration to job creation for the youth based on sound initiatives identified in the Governor's manifesto and during the county stakeholders' consultation for the CIDP will be considered as well as disability and gender mainstreaming.

<b>Grand Total</b>	<b>5,377.970</b>	<b>2,486.850</b>	<b>7,864.82</b>

#### 4.2.2 Revenue Projection

The 2025/26 fy CADP will be financed through the equitable share, the County own source revenue and conditional grants from the National Government & other development partners.

The revenue projections in the CADP are as highlighted in the table below.

REVENUES	PROPOSED REVENUES
Equitable Share	6,100.00
County Own Source Revenue	600.00
FIF	200.00
Conditional loans and Grants from National Government and Development Partners	964.82
<b>TOTAL</b>	<b>7,864.82</b>

### **4.2.3 Estimated Resource Gap**

The county anticipates to raise all the projected revenues in the plan

### **4.3 Risk management**

Projections are based on critical assumptions about GDP, wage and productivity trends, interest rates and much more. Key social and economic assumptions underlie these projections, including the estimated impact of fiscal trends on national output, prices, and interest rates.

The basic assumption that has been applied in this plan is full management and control of global and national economy especially on the cost of living and vicious political cycle.

Macroeconomic policies are typically assumed to be "unchanged" over the projection period and based on current fiscal and monetary policies. Interest rates will remain relatively static both in terms of investments and borrowing, inflation is assumed to be moderate and Capital investment is proposed to increase substantially given the assumptions around interest rates. The forecasts represent the likely outcomes for growth.

The County is highly dependent on revenues from the National Government and Conditional Grants from various Development Partners. To this end, the County expects that all the revenues streams will be released to the County for all the anticipated programmes and projects to take off.

To ensure planned and sustainable growth the County Government will continue to synergize its efforts in implementing the socio-economic priority programmes as articulated in the County's Integrated Development Plan III (2023-2027) and all other relevant policy documents. The County is desirous of ensuring that ongoing programmes and projects are undertaken and completed.

Adherence to all the fiscal principles as captured in the constitution of Kenya 2010, and the PFM Act, 2012 is of the essence in the County operations. All programmes and projects implemented are to also adhere to other legal instruments such as the Procurement and Disposal Act and Regulations among other existing policy guidelines. The County is expected to implement the risk policy.

Disruptive events, such as industrial action, political activities among others are not expected to hinder the implementation of the programmes and projects targeted for the FY 2026/26.

Table 4.5: Risk Management

Risk Category	Risk	Risk Implication	Risk Level (Low, Medium, High)	Mitigation measures
Strategic	Poor plans and priorities Lack of goodwill Political interference Conflict of interest	Failure to actualize plans Loss and/or misuse of public funds Misallocation of Resources Poor oversight	High	Strategic planning and management  Effective conflict resolution  Partnership and collaboration
Financial	Inadequate financial resource Unrealized revenue targets Untimely exchequer release of funds Embezzlement of funds Non-compliant financial reporting	Stalling of projects High cost of project implementation Poor returns from investments Mismanagement of assets /liabilities	High	Development and implementation of a resource enhancement plan.  Effective Cashflow projection plans  Asset management  Enforce full Compliance with the PFM Act
Operational	Inadequate human resource capacity	Failed /poor service delivery	High	Adequate staffing and Continuous training.
	Flawed processes			Succession planning and management
	Unavailability/ systems failure			Strengthening internal control systems.
Reputational	Adverse media coverage and public attitude	Loss of stakeholder confidence	Medium	Public involvement and participation  Effective communication strategy
Compliance	Non-compliance with existing laws and procedures	Breaches of compliance and regulatory requirements Legal Liabilities and/or loss	Medium	Punitive measures in place
External	Climate change	Drought, floods and crop failure	High	Adopt climate-smart agriculture
	Rapid Technological changes	Obsolete assets and systems	Medium	Training and retraining of staff on emerging technologies

## CHAPTER FIVE

### MONITORING, EVALUATION AND REPORTING

#### **5.1 Introduction**

The Monitoring and Evaluation (M&E) framework is vital for efficiently tracking the development goals specified in this plan. Monitoring involves a structured method for gathering and analyzing data on the progress of programs and projects. Evaluation is key in measuring actual performance against established targets and intended outcomes. The primary aim of M&E is to offer detailed insights into progress, challenges, lessons learned, and any new issues that arise during the execution of Nyandarua County Government programs and projects.

#### **5.2 Performance Indicators**

A set of indicators aligned with the overall strategic objectives of the plan has been established. These indicators will facilitate monitoring the outputs and outcomes of the projects and programs being implemented, providing insight into whether the goals are being achieved. The following are the Key County Indicators that will be monitored for each department during the plan period.

#### **5.3 Data collection, Analysis, and Reporting Mechanisms**

Data will be gathered throughout the implementation of programs and projects, with the methods used depending on the specific indicators. Typically, both qualitative and quantitative data will be collected.

For qualitative data, the collection methods may include before-and-after surveys, questionnaires, departmental and agency reports, as well as statistical records. Quantitative data will be gathered through mechanisms such as field observation visits, stakeholder meetings, and interviews.

Mechanisms of data analysis

The collected data will first undergo preliminary analysis, which involves disaggregating and cleaning the data. Subsequently, suitable data analysis tools will be used to examine both qualitative and quantitative data, and the findings will be presented in user-friendly formats that are easy to understand.

Mechanisms of data reporting

The County will need to implement a strategic reporting system that allows for quick and easy retrieval of information. The M&E Unit at the County level will play a crucial role in generating M&E information.

Legislatively, CIMES (County Integrated Monitoring and Evaluation System) requires that reports on County government programs and operations be submitted regularly to the County Assembly and the Senate, through ADP reviews and CoMEC reports. This process aims to improve transparency and accountability in County government activities for both County Assembly members and residents.

County Monitoring and Evaluation progress reports (COMERs) will also be included in the national Monitoring and Evaluation report and submitted to the MED according to CIMES guidelines. While the County is responsible for planning and managing internal reporting, adopting the e-CIMES electronic approach will allow data collected at each devolved level to be automatically aggregated from village to ward, sub-County, and County levels.

To align with the national APR reporting schedule, the County will follow this procedure:

- i. Sub-counties and sectors will submit their reports to the County M&E Unit through the SCoMEC and SMEC, respectively.
- ii. The County M&E Unit will compile these reports into a County M&E report for submission to CoMEC.

At an operational sector level, CIMES will serve as a tool for learning, aiding in program and project improvements and the development of effective management practices. For individual County departments, the CECM, who is responsible for governance and departmental performance, will use CIMES as a key management and accountability tool. It will also provide essential information for strategic reviews needed to make decisions about program and project priorities and potential changes.

#### **5.4 Institutional Framework**

The National Government operates the National Integrated Monitoring and Evaluation System (NIMES), which supports the County Integrated Monitoring and Evaluation System (CIMES). This system integrates all monitoring efforts into a national framework that aligns global goals and agendas with local development strategies and initiatives. Monitoring systems at the Sub-County level will contribute data to the County level, which will then be integrated into the national system. Throughout the plan period, continuous monitoring will be carried out by various bodies, including County Assembly Committees, the County M&E Committee (CoMEC), Sub-County M&E Committees (SCoMEC), the M&E Unit, and Sector Monitoring and Evaluation Committees (SMEC).

## 5.5 Dissemination and feedback Mechanism

Data will be shared through various methods, including report publications, news releases, press conferences, or updates on the County website. To ensure effective decision-making, agendas for relevant County meetings will consistently feature a review of indicators and sector progress reports, with complete reporting documents provided to participants in advance.

When feasible, progress reports will be available electronically, integrating both data and narrative commentary with supporting evidence. Ultimately, the County aims to automate report production so that once data is entered, it can be instantly accessed and automatically formatted in all necessary formats with a single click.
