## **Public Participation on Pre-Feasibility Study and Investment Plan**

### **Engineer Municipality**

**Date:** 22 January 2026

**Venue:** ACK Hall

---

### **1. Introduction**

Engineer Municipality held a public participation forum on 22 January 2026 at ACK Hall to present the findings of the Pre-Feasibility Study and the proposed Municipal Investment Plan. The session aimed to inform stakeholders about priority development projects and obtain community feedback before finalization and implementation.

---

### **2. Objectives of the Forum**

- To present key findings of the Pre-Feasibility Study.
  - To outline proposed priority projects under the Investment Plan.
  - To collect public views, concerns, and recommendations.
  - To promote transparency and community ownership in municipal development planning.
- 

### **3. Participation**

The meeting was attended by:

- Municipal leadership and technical officers
  - Members of the general public
- 

### **4. Key Presentations**

Municipal technical staff presented:

- Economic and infrastructure assessment findings
  - Priority investment areas (roads, water supply, sanitation, markets, and public facilities)
  - Estimated project costs and potential funding sources
  - Implementation timelines and expected socio-economic benefits
- 

## **5. Key Issues Raised by Participants**

### **a) Infrastructure Development**

Residents emphasized the need to prioritize road rehabilitation, drainage systems, and reliable water supply.

### **b) Financial Sustainability**

Concerns were raised about funding sources, affordability, and long-term maintenance of proposed projects.

### **c) Transparency and Accountability**

Participants requested regular updates on project implementation and expenditure.

### **d) Environmental and Social Impact**

Stakeholders recommended that projects integrate environmental protection measures and consider potential social impacts.

### **e) Local Economic Opportunities**

Community members encouraged the municipality to ensure local labor and suppliers benefit from the proposed investments.

---

## **6. Recommendations**

1. Incorporate community feedback into the final Investment Plan.
  2. Prioritize high-impact and urgent infrastructure projects.
  3. Strengthen communication channels for continuous public updates.
  4. Explore partnerships with development partners and private sector investors.
  5. Develop a clear monitoring and evaluation framework.
- 

## **7. Conclusion**

The public participation forum provided a constructive platform for dialogue between the municipality and stakeholders. The feedback received will guide refinement of the Pre-

Feasibility Study and Investment Plan to ensure it is responsive, sustainable, and aligned with community priorities.

Engineer Municipality reaffirmed its commitment to inclusive, transparent, and sustainable development planning.
